

Cybertech Africa 2023

Kigali Convention Center, Rwanda, August 1-2, 2023

Innovation Partner

AFRICA and CYBERTECH – Stronger Together

As Africa leapfrogs development stages with technological advancements, it is becoming one of the fastest growing innovative and cyber regions in the world. It has resulted in an equally rapid expansion of cyber crimes and the need to integrate cybersecurity into business strategy and policy considerations.

The government of Rwanda, in particular, has embarked on developing a cybersecurity policy and strategy as a response to the growing cyber threat and improving cybersecurity for individuals, businesses, critical national infrastructure, and government.

Cybertech is focused on creating business networks. We stand at the forefront of global cyber innovation and creating opportunities across borders. With this in mind, Cybertech Africa 2023 will take place on August 1-2, at the Kigali Convention Center in Rwanda – the first time it is coming to the African continent.

From lectures to plenary sessions and high-level VIP speakers, Cybertech Africa 2023 will feature an extensive exhibition for multinational companies and SMBs, and a Startup Pavilion for new and innovative startups to feature their cutting-edge technologies. As a leading platform for exchanging and sharing ideas, networking, and B2B opportunities for cyber professionals, Cybertech Africa looks ahead to the future – in all cyber trends, including finance, security, IoT and 5G, AI, critical infrastructure, sustainability, and more.

Cybertech is in the business of connecting people and creating a cyber community. Our thought-provoking conferences and exhibitions set the stage for influential speakers and panelists who are the brains behind the most innovative and advanced cyber technologies.

Cyber. We live it. Breathe it. And we are setting the stage for global cyber innovations and solutions.

THE FUTURE OF AI

In collaboration with

Microsoft
for Startups

Hall: Quantum | 15:00-20:00

Cybertech Special Seminars

The Cybertech two-day conference will include, in addition to the Main Agenda, a wide variety of special seminars. These events will cover sector-specific topics, such as finance, security, entrepreneurship, artificial intelligence, transportation and more that are specifically related to the African continent.

We Invite And Encourage Participation From All Sectors

Fintech

The IoT and 5g Era

Women in Tech

Police, Interpol, and Intelligence

The AI Revolution

Protecting Critical Infrastructure

Building a Successful Startup

Aviation and Space Cybersecurity

Maritime Cybersecurity

Sustainability

AFRICA CISO SUMMIT

An unprecedented event focusing on the most vital challenges in the global cyber world

The Africa CISO Summit, the continent's first-ever event for the greatest global cyber challenges, brings together the most forward-thinking, astute, and innovative minds in Africa.

DX5 and Cybertech's exclusive think tank-style forum will be dedicated to analysis, discussions, and deliberations to challenges in the cyber field.

It will include opportunities to share ideas, thoughts, and creative concepts, and network with other high-level CISOs who similarly focus on cyber and innovation. These unique brainstorming sessions will gather knowledge from around Africa and culminate in an invite-only, upscale dinner.
